PROFILE

Frappe/ERPNext developer and project lead working in the ecosystem since January 2023. Delivered custom business systems for clients in India, the UAE and Saudi Arabia, from requirements and process mapping through development and deployment. Work includes multi-branch retail, CRM and procurement systems; currently building Livo and Nexfuel as independent products.

CORE SKILLS

Frappe Framework: Custom apps, DocTypes, hooks, permissions, workflows, reports and REST API integrations

ERPNext Modules: Accounting, Manufacturing, Selling, Buying and Stock

Frappe Apps: CRM, HRMS, Helpdesk, Frappe LMS, Raven, Frappe Insights and Frappe Builder

Engineering: Python, JavaScript, TypeScript, React, MariaDB/MySQL, OAuth2 and Git

Delivery: Discovery workshops, process mapping, SRS, solution design, deployment and team coordination

PROFESSIONAL EXPERIENCE

Independent Product Developer | Livo and Nexfuel | 2026 to Present

- Building Livo as a multi-outlet platform on Frappe and ERPNext, with a React interface tailored to restaurants, supermarkets, bakeries and other retailers.
- Built shared outlet management, role-scoped access, inventory and purchasing, billing, shifts and consolidated reporting; developing Livo Resto as a restaurant extension for tables, kitchen order tickets and kitchen stations.
- Developing Nexfuel for fuel-station operations, including shift opening and closing, tank dip logs, cash variance, credit sales and reports.

ERPNext Developer and Project Lead | Tridz Technologies | Jan 2023 to May 2026

- Led ERPNext delivery from client discovery and software requirement specifications through project roadmaps, development and deployment; coordinated developers and business stakeholders.
- Designed custom Frappe apps, role-based processes and third-party integrations for retail, CRM, HRMS, support and procurement clients in India and the GCC.
- Mapped operational needs to standard ERPNext processes and targeted customizations, including remediation of over-customized implementations.

CLIENT PROJECTS

Talal Online Supermarket | UAE retailer with 75+ branches | Frappe, ERPNext, React, WhatsApp

- Led backend development and deployment of an ordering and delivery platform that replaced manual order workflows with WhatsApp onboarding, a React storefront and ERPNext order management.
- Implemented catalog and cart workflows, order tracking, branch-specific inventory and delivery operations, and dynamic delivery-slot availability for customer scheduling.
- Added delivery-agent assignments, permissions, complaints and feedback; synchronized stock and pricing with Google Apps Script.

Yasser Hameed Retail | Saudi retailer with 10+ branches | ERPNext, HRMS, consulting

- Assessed ERPNext and HRMS workflows affected by extensive customization; worked with stakeholders to identify process and architecture issues.
- Led a development-team redesign around standard ERPNext capabilities, with focused customizations for business-specific needs.

Dieture | Frappe, CRM, HRMS, Helpdesk, Raven, AI

- Led delivery of a custom CRM integrating WhatsApp, Messenger and Facebook for lead capture and automated support tickets.
- Built conversation recording, transcription and intent extraction to surface customer needs and operational insights.
- Connected HRMS, Helpdesk and Raven to consolidate previously separate customer, employee and support tools in a Frappe-based system.

Admiral Marine | Python, OpenAI, Frappe, ERPNext

- Developed an AI-assisted RFQ workflow that extracts request data and matches items with ERPNext inventory and procurement records.
- Implemented multi-tier matching and categorization, and retained processed RFQs for reuse on recurring requests.

Lotify | B2B clothing commerce | Frappe, ERPNext, payment integration

- Built an ERPNext-connected B2B storefront spanning products, customers, sales, inventory and purchasing workflows.
- Added verified-customer approval and payment-gateway integration so approved buyers could place orders online.

Rehbar | Frappe, CRM, Frappe Insights

- Developed investor transactions, profit-sharing and financial-record workflows based on ERPNext shareholder concepts.
- Built Frappe Insights dashboards for fund monitoring and earnings visibility.

OPEN SOURCE AND RECOGNITION

Ghost | Frappe guest identity framework | Python, OAuth2, REST APIs

- Built guest sessions that convert to user accounts while preserving state, with OAuth2 bearer tokens, OTP conversion, account/data merging and session cleanup.
- Exposed APIs for guest carts, wishlists and SaaS onboarding, including configurable session expiry and automated cleanup.
